The BusinessWorks Gold General Ledger module is the heart of our business accounting solution and is our most powerful module. Combining flexibility with ease of use, the General Ledger module gives you the critical information you need to make timely and informed business decisions.

The General Ledger module maintains current financial information, as well as transaction history and budget information for up to nine fiscal years. This module also allows a virtually unlimited number of accounts in the chart of accounts, each with up to 999 departments. The General Ledger module not only organizes all of your financial information from our other BusinessWorks modules, it can also combine information from multiple companies into a single consolidation company for financial reports.

Accurate financial statements and associated reports generated by a general ledger system are critical for timely decision making. Therefore, it is imperative that a general ledger system be powerful, flexible and informative to management, yet still be easy to use and operate. With BusinessWorks Gold, you can rest assured that your crucial accounting information is precise and accessible whenever and wherever you need it.

\*Specifications denoted with an asterisk (\*) are practical limits. They are to be used as guidelines only and do not necessarily reflect the actual limitation. Individual requirements may vary based on the system you are using.

## BusinessWorks Gold General Ledger

*"BusinessWorks has made my life easier. It gives you clear, concise instructions that prevent you from making errors. If you can balance your checkbook, you can use BusinessWorks."*

*Brian MacMurdo, Business Manager  
Oakland Anesthesia Associates*

### FEATURES:

#### General Features

- Maintains complete audit trails of all transactions and adjustments.
- Provides extensive inquiry capabilities to examine account status, including the ability to drill down to the source of the original postings, balance history, budgets and transactions.
- Imports account information and journal entries from a text file.

#### Maintenance Features

- Combines data from multiple companies to create a consolidated financial statement.
- Enables departmentalized accounting with up to 999 departments.
- Chart of account numbers can be easily renamed and renumbered to accommodate your company as it grows.
- Add new accounts on the fly during journal entry to save time and minimize workflow interruptions.
- Automatically add departmentalized accounts for faster setup of the chart of accounts.

#### Budget Features

- Automatic budget calculation for faster budget setup.
- Budgets can be automatically calculated based on actual expense and income information for the prior or current year, saving valuable time. Budgets can also be created based on budget information for other periods.
- Budget history is tracked for up to nine fiscal years providing detailed budgeted income statements.
- Enables you to edit budgets either by fixed amounts or by percentages at any time.
- Financial reports are available to keep the manager informed and on track to meet budget goals.

#### Journal Features

- Both the system date and posting date are included for all journal entries, creating a more complete audit trail and better accuracy.
- Provides virtually unlimited special journals for custom use.
- Maintains separate journals for accounts payable, accounts receivable, inventory control and payroll for streamlined report generation.
- Maintains recurring journal entries to save data entry time.
- Allows batch posting for recurring entries.

- Prevents out-of-balance entries in the general ledger to help maintain the accuracy and integrity of your financial information.
- Lets you include detailed descriptions for journal entries, providing increased accuracy.
- Allows editing of journal entries (description and voucher reference) after posting.
- Enables you to import and export journal entries including adjusting entries from your CPA.

#### Reporting Capabilities

- Enables you to sort and print a variety of reports by department, giving you a clearer picture of your company's financial allocations.
- Standard reports can be formatted to create a professional look. Customize your financial statements with different section headings, page breaks, font styles, sizes and colors.
- Allows subtotaling and consolidation accounts for custom financial statements.
- Provides flexible financial statement setup, which includes period selection, rounded dollar amounts, customized notes and more.
- Produces monthly, quarterly, yearly and date-range financial statements.
- Flash reports are available to provide the business manager with a clear overview of the financial strengths and opportunities of the organization.
