MAS 200 Modules in Operation

- Accounts Payable
- Accounts Receivable
- Bank Reconciliation
- General Ledger
- Inventory Management
- Payroll
- Purchase Order
- Sales Order

Third-Party Modules

- DFA DLOC Warehouse Management System
- Kissinger EDI Advantage
- McCabe Sales Order Modification and Direct Deposit

Haywin Weaves Seamless Solution with MAS 200 and EDI Advantage

“We’ll do business with you if you get EDI.” That’s what the nation’s largest retailer told Haywin Textile Products in 1997, back when e-commerce was still in its infancy. Haywin was then a player in the home furnishings industry, manufacturing and distributing sheets, bedspreads, comforters and bed-in-a-bag products.

Few competitors were positioned to join the retailer in e-business. Haywin stepped up to the plate and launched a fully automated MAS 90 system with electronic data interchange (EDI) capabilities. Business increased significantly, profits soared, and now the company is a licensing partner with heavy hitters like Fruit of the Loom and Beautyrest.

Starting from Scratch

When approached by the retailer, all of Haywin’s business functions were being performed manually. So the company started from scratch to create a new system. The first step was adoption of MAS 90, followed by add-on modules from several Best authorized developers:

McCabe Sales Order Modification module, DFA warehouse management system, and Kissinger EDI Advantage.

Robert Brownstein, CFO, and Francisco Cruz, director of MIS, were already experts on MAS 90 from former positions. They worked closely with their reseller for smooth integration of all modules and speedy launch of EDI. Once electronic interfacing with the major retailer was operational, many other EDI-based relationships quickly followed. The increased volume has prompted Haywin to upgrade to MAS 200

CHALLENGE

Obtain a fully automated accounting solution with EDI Advantage compatibility, easy data access and room for growth.

SOLUTION

MAS 200 financial and distribution modules as well as EDI capabilities.

RESULTS

Seamless software interface; Streamlined data flow; Automation from a to z; Instant data access and order processing; Direct communication with customers; Leveraged technology for more strategic positioning.

“Electronic sophistication lets us work with the leading names in our industry. This never would have been possible without MAS 200 and EDI Advantage.”

*Robert Brownstein
CFO
Haywin Textile Products, Inc.*

for extra speed and easier access to customer records.

Sewing Up the Competition

Why EDI instead of Internet-based commerce? According to Brownstein, large retailers often prefer communicating with suppliers on secure servers rather than via potentially hackable Internet connections. EDI technology provides a dedicated channel that retailers configure to their specific needs. “Using EDI is the only way to succeed in our business today,” he says.

Kissinger EDI Advantage features multiple mapping capabilities and complies with a wide variety of trading partner requirements. Haywin uses the module to receive electronic customer orders and to download information directly to its MAS 200 accounting software. MAS 200 then creates a sales order complete with item numbers. Processing that previously took 15 minutes per order is now completed instantaneously. “Since we’re in direct communication with our customers, orders are completed literally in seconds,” says Brownstein.

The feats being accomplished by MAS 200 and EDI Advantage are remarkable given Haywin’s business complexity. “Our customers can have as many as 2,700 stores, each placing individual orders to replenish inventory,” notes Brownstein.

“One buying office might send us a purchase order for delivery to 500 different stores. We’d be sunk without MAS 200 and the modules that manage our ordering, tracking, shipping and warehousing procedures.”

Haywin employees enjoy enhanced access to the customer database. They can go directly to customer files, perform searches and provide updates on order status — all just by clicking on a Web page.

Customers have been enthusiastic about Haywin Textile’s system. The company was recognized by both IBM and Cisco for its innovative business solutions, and was featured in the Investors Business Daily.

“The Best system allowed us to make a quantum leap in our business,” says Brownstein. “Electronic sophistication lets us work with the leading names in our industry. This never would have been possible without MAS 200 and EDI Advantage.”
